

SRIYA POTHULA

Aldie, VA • 703-600-9515 • sriyasriya569@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

TECHNICAL SKILLS

Languages & Querying: SQL, Python, PySpark, DAX, C++

Data Platforms: Snowflake, PostgreSQL, Databricks, AWS (S3, Redshift, Lambda), MinIO

ETL & Data Modeling: ETL/ELT Pipeline Design, Dimensional Modeling, Data Warehousing, Workflow Automation

BI & Visualization: Power BI, Dashboard Design, Data Storytelling

AI / ML & Other: RAG, FAISS, Vector Databases, NLP, OpenAI API, HuggingFace, Git, REST APIs, Next.js

EXPERIENCE

Top Marble & Granite, LLC

April 2026 – Present

Business Intelligence Analyst

Chantilly, VA

- Leading the development of Stone Dash (SaaS), integrating Snowflake-backed analytics with a customer-facing inventory platform to bridge operational data with frontline systems.
- Designed and built interactive Power BI and Snowflake dashboards delivering real-time visibility into sales, inventory, and demand forecasting, contributing to a 33% revenue increase.
- Architected dimensional data models and SQL ETL pipelines feeding executive dashboards, reducing manual reporting time and improving data accuracy across business units.

Handshake AI

April 2026 – Present

AI Trainer

Remote

- Built and optimized data preprocessing and transformation pipelines for structured and unstructured datasets, improving downstream model performance and reliability.
- Engineered scalable retrieval pipelines using vector databases and embeddings, supporting large-scale use cases.
- Developed Python and SQL automation workflows, streamlining internal research and operational processes.

Top Marble & Granite, LLC

August 2025 – December 2025

Business Intelligence Intern

Chantilly, VA

- Designed optimized SQL data models and ETL workflows, improving reporting efficiency and reducing manual aggregation effort.
- Integrated a generative-AI imagery feature into the website, dynamically producing slab visualizations from product metadata and eliminating dependence on manually captured photography.

Infosys

March 2021 – December 2023

Senior Data Engineer, SAP Platform

SEZ

- Built enterprise-scale Python and SQL data automation pipelines supporting SAP production environments, reducing manual reporting workloads by ~30 hours per week.
- Designed and maintained data flows across SAP SD, TM, and S/4HANA systems for global enterprise clients, ensuring data integrity across freight, order, and shipment domains.
- Diagnosed and resolved critical P1/P2 data-integrity incidents via ServiceNow, maintaining high system reliability across global operations.

PROJECTS

ALFA8 — Hybrid Search Data Pipeline | *Python, PostgreSQL, pgvector, FastAPI, Sentence Transformers*

- Designed and built an end-to-end data pipeline ingesting documents into PostgreSQL with pgvector, supporting hybrid semantic and keyword retrieval.
- Implemented chunking, embedding generation, and vector indexing as a modular pipeline, optimizing ingestion throughput.
- Built REST APIs for downstream querying and tuned hybrid score weighting between semantic and lexical signals to improve retrieval accuracy.

Clinical QA System | *Python, FAISS, HuggingFace, SBERT, NLP*

- Engineered a data pipeline for processing and indexing clinical documents using FAISS, achieving sub-second semantic retrieval over the full corpus.
- Built a preprocessing workflow for unstructured clinical text tokenization, normalization, and domain-aware embedding generation.
- Designed an evaluation framework comparing pipeline performance against ground-truth QA pairs.

EDUCATION

Master of Science in Data Analytics Engineering, George Mason University

December 2025

Bachelor of Science in Electronics & Communications Engineering, SRKR Engineering College

May 2020
